Maps from Alaska to Zaire

New Color Clip Art Raises Standard

Irvine, CA — A brand-new library of clip-art symbols and backgrounds is now available from Zenographics, Inc. **ArtPack II** contains over 1000 full-color CGM files, perfect for importing into desktop publishing and presentation graphics layouts. Also included is a 56-page, wire-bound manual with full color representations of every image.

The pictures are all vector-based, so they can be infinitely scaled without concern for the image degradation associated with bitmapped graphics. There are 40 picture categories, samples of which are shown around this page with their category designations. Maps of the world are divided into the 50 states, Africa, Asia, Canada, Europe, Mideast, South America, the republics of the former Soviet Union, and an "Other" category for the remainder.

These symbols were originally designed for professional use in Zenographics Mirage, a presentation graphics package widely used in slide-making service bureaus and corporate art departments.

ArtPack II is now being made available to the wider CGM market. It can be purchased directly from Zenographics and is available on 5.25" or 3.5" diskettes. Suggested retail is $195.00.

Printed from Aldus PageMaker on the Canon Color Laser Copier using SuperPrint by Zenographics.
