Black: 97

dp(6d) i thought of o 10, if not p11
playboy(NR) kishiko p11 allow s 13 group connect
w think he could win if he remove b's moyo

White: 98

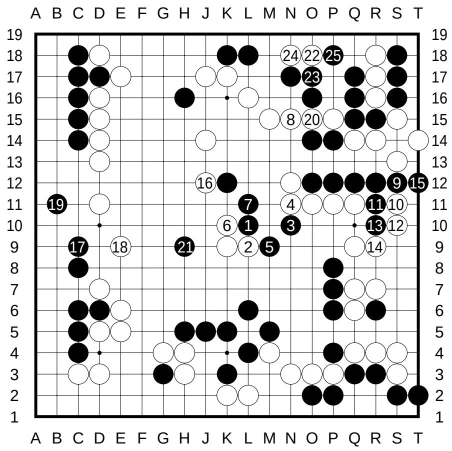
kishiko(4d) i see, thank you
gom(4d) without p11, no connection?
dp(6d) i think LR corner was too small.
playboy(NR) whaoo w is goint to give up s13 group

Black: 99

mozart(4d) isn't it too big to give up?
playboy(NR) i can not believe o14
dp(6d) wasn't it early to say that?
kishiko(4d) me neither, would s12 have captured playboy?
dp(6d) would there hve been a way to kill it?
playboy(NR) i think so Kishiko
kishiko(4d) Now white definitely plays s11 isn't it?
playboy(NR) i think so , but it is not pleasnt for white either
dp(6d) what if w p13, o14, o13,?

White: 100

kishiko(4d) white leaves it for now, flexible!
jjs(4d) then b r12 may be captured?
mozart(4d) then s13 die i guess



Black 101 – Black 125

Black: 101

mozart(4d) if b played s12
jjs(4d) b's moyo becomes w's moyo
dp(6d) i don't think so at all. there was no way to kill.

White: 104

Black: 105

mozart(4d) maybe i am wrong

Black: 107

yi(3k) is h12 big?

yi(3k) can b just s12?
dp(6d) a bad mistake?
mozart(4d) disaster!

Black: 109

dp(6d) or aiming at the center group?
m8?

White: 114

playboy(NR) this is weird
jansteen(4) agree
gom(4d) n15 is approximately pass???
dp(6d) i think w just assumed that b would connect at o15.
yi(3k) Mr. Park is too tired

Black: 115

gom(4d) agree,dp. but it means w would not do s11 after it.

White: 116

dp(6d) why not?
gom(4d) what was he thinking?

Black: 117

dp(6d) i think he would do s11 after it.

jansteen(4d) black was calculating semeai after w o15
gom(4d) i think if he would s11, n15 needs not only ko threat
White: 118
playboy(NR) n15 is a mystery
mozart(4d) is this 0.5 komi game?
jansteen(4d) It's 5.5 komi Mozart

Shuku(6d) hi do u all play in keyboard, not mouse?
dp(6d) but a gote. right?
Black: 121
jansteen(4d) We play mouse, talk keyboard :)
gom(4d) it makes b play blanks
playboy(NR) it force b semiai anyways
fmc(6k) and fight with whatever we can :)
jansteen(4d) right, semedori now, big
Shuku(6d) bad, I still play in keyboard and nobody teach how to use mouse :(
dp(6d) what is semiai or semedori?
gom(4d) semiai means su sang jeon???
playboy(NR) and something around q18 i think soo—sang—jeon
dp(6d) q18 then, p17?
zhuge(NR) sorry i've not watched the game closely... who's opponent is not better now? :—)
Black: 123
dp(6d) o 17 a bit dangerous.

Black: 133
gom(4d) nice counting zhuge
White: 136
dp(6d) anyways h9 was a mistake.
White: 138
dp(6d) g8 another big one i think
gom(4d) he's claiming it isn't mis
jansteen(4d) white might loose this game
dp(6d) not sure if w secures the whole center.
Black: 139
playboy(NR) believe or not it is close again
blowfish(4) black is still up by no more than 5, que no?
jansteen(4d) Howcome playboy?
Shuku(6d) how about komi?
blowfish(4k) counting komi.
mozart(4d) that was because w ahead a lot before n15...
White: 140
gom(4d) ?
Shuku(6d) typo
dp(6d) no i don't think so.
Shuku(6d) how about atari in h13?
